PROFILE

Full-stack JavaScript / TypeScript developer. I design, test and deploy complete web applications: interface, server logic, database, containers and continuous integration. Strong interest in infrastructure and application security.

EDUCATION

Today	**Computer science studies** · University of Montpellier
2024	**Bachelor's in computer engineering (software)** · Islamic Azad University, Tehran EQF level 6 (bachelor's level) according to the ENIC-NARIC France statement of comparability.

PROJECTS IN PRODUCTION

NEXORA – complete e-commerce store

nexora.siavashizadi.com

Next.js 16, TypeScript, PostgreSQL, Prisma, Stripe, better-auth, Docker

- Catalog, cart, Stripe payments (test mode), customer accounts and a back office with an audit log.
- Stock reserved by one atomic SQL query: tested with 8 simultaneous purchases of 3 units, no overselling.
- 79 unit and integration tests, 20 end-to-end tests (Playwright, axe accessibility checks), full CI.

siavashizadi.com – self-hosted portfolio

siavashizadi.com

Next.js 16, TypeScript, Tailwind CSS, Docker, Nginx, GitHub Actions

- Automatic deployment on every push: tests, Docker image, release on my server, rollback on failure.
- Unprivileged, read-only container; CSP and security headers checked by the tests.
- Contact form validated on the server, with rate limiting and spam protection.

ApplyFlow – job-search tracker

applyflow.siavashizadi.com

Next.js 16, TypeScript, PostgreSQL, Drizzle, better-auth, Telegram Bot API, Docker

- Applications, interviews and follow-ups; new job offers found every day (La Bonne Alternance API); a Telegram bot to save an offer from your phone.
- Isolation between users enforced by the database (composite foreign keys); 68 unit and integration tests, 12 end-to-end.

SKILLS

Languages	TypeScript, JavaScript, SQL, HTML, CSS
Front end	React, Next.js (App Router), Tailwind CSS, accessibility
Back end	Node.js, Next.js (Server Actions, Route Handlers), REST APIs, Zod
Data	PostgreSQL, Prisma, Drizzle
Testing	Vitest, Playwright, axe
DevOps	Docker, Nginx, Linux, GitHub Actions, HTTPS (Let's Encrypt)
Security	CSP, server-side validation, access control, least privilege

LANGUAGES

French, English, Persian
